Day 16

Today with start of week-4 I started working on designing my project web page called "Micro"- A Podcast Webpage.

Work Done:

- Initiated the HTML structure of the podcast web page.

- Created the basic layout using semantic tags like <header>, <main>, <section>, and <footer>.

- Set up the <head> section with:

    o Google Fonts (Josefin Sans).

    o Favicon.

    o Responsive meta tags.

    o External stylesheet links.

- Developed the header with a logo, navigation bar, and action buttons (search, login, cart, donate).

- Implemented the hero section, including a hero image/title, "Listen Now" button, and platform subscription links (Apple Music, SoundCloud).

- Ensured responsive design with proper container and class usage.

Skills Applied:
HTML5, semantic structure, layout planning, responsive thinking.

Tools Used:
VS Code, Live Server,
